

Use case

1. User enters e-commerce website.
2. User logs in to the account.
3. User checks the order status.
4. User logs out of the account.

Number of the users

Within the day website is visited by 2000 users.

Website traffic

The biggest website traffic is between 10am-12am. The website is visited then by 60% of users. It gives 10 users per 1 minute. Assuming that the website traffic increases by 150% 25 users were used to tests.
